

SANDESH JONNALA

Senior Database Administrator

ABOUT

10+ years of experience in IT as a DBA on MS SQL SERVER 2022 / 2019 / 2016 / 2012 / 2008 R2 / 2005 Administration and Support in Windows platform.

Providing 24/7 on-call support in Domain including Banking, maintained over 200+ Production, and pre-production instances along with 50+ DEV instances of SQL Server 2000, 2005, 2008, 2008R2, 2012, 2016 and 2019 as standalone and Clustered servers with Prod and DR synchronized by Log shipping / Mirroring / Replication Always on group High availability.

KEY AREAS OF IMPACT

Database Administration

Performance Tuning

Incident/Change Management

Server Migration

Process Automation

People Management

CERTIFICATIONS

- Microsoft SQL Server Administration (**70-462**).
- Microsoft Azure Administration (**AZ-103**).
- Microsoft Azure Database Administrator Associate (**DP-300**).
- Good Knowledge of ITIL Best Practices IM & Change Management modules.

EXECUTIVE SUMMARY

- Database Operations with 10+ years managing multi-TB SQL Server estates, leading 24x7 DBA operations, driving vendor accountability, and improving performance, resilience, and operational governance for mission-critical platforms.
- Experience in Installation, configuration, and maintenance of MS SQL Server 2005 / 2008 / 2008R2 / 2012/2014 /2016 /2019 /SQL 2022.
- Manage work intake, prioritization, SLA adherence, escalation handling, and acceptance of deliverables.
- Improved vendor performance and reduced operational overages through structured governance and capacity planning.
- Owned database access provisioning, RBAC enforcement, quarterly access reviews, and vulnerability remediation in partnership with Security teams.
- Manage login provisioning, access governance, and compliance documentation.
- Owned backup and recovery outcomes, implemented DR drills, and ensured RPO/RTO compliance across multi-TB workloads.
- Provide operational support to key environments including user account management, workflow, and log analysis, troubleshooting and service optimization.
- Enhanced automation ecosystem using PowerShell and T-SQL, reducing manual operational tasks by 40-50%.
- Directed database operational activities during maintenance windows and participated in CAB to ensure operational readiness and change validation.
- Implemented high availability techniques like Log shipping, Mirroring, Fail-over Clustering and Always-On.
- Replication Monitoring (Maintenance of Agents and Publisher, Subscribers and Distributors)
- Built and improved monitoring dashboards (Grafana, SQL Sentry), reducing MTTR and improving proactive detection.
- Having good Knowledge in setting up and troubleshooting High availability solutions like Log shipping, Replication, Mirroring.
- Performed capacity planning, identified resource constraints, and optimized vendor-hour utilization to reduce operational overages.
- Knowledge on Migrating SQL databases from On Premise to Azure (PaaS) by DMA (Data Migration Assistant).
- Good experience on Migrating SQL Databases from On Premise to Cloud like Azure (IAAS) SQL VMs.
- Exposure on Backup Azure SQL DBs in Azure and Automation of SQL DB backups.
- Served as escalation point for high-severity performance including blocking, deadlocks, slow queries, and I/O bottlenecks incidents, leading root-cause analysis and permanent fixes.
- Quick learner on a given project's domain and technical knowledge.

TECHNICAL SKILLS

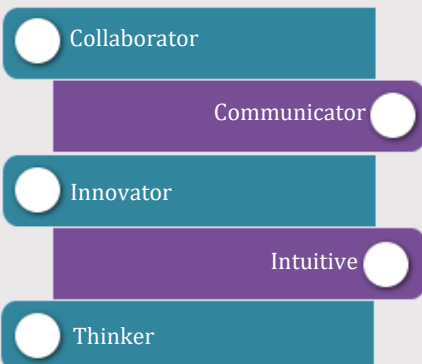

OS: Windows, Linux & Unix

RDBMS: MS SQL, Oracle, PostgreSQL

Cloud: Azure, AWS & GCP

Languages: TSQL, PowerShell

SOFT SKILLS

TOOLS

FTP: Robo-Copy, WinSCP, Az-Copy

Backup Tools: SQL Lite speed, DD Booster, Red Gate, Commvault.

Monitoring Tools: Win Perf-Mon, SQL Profiler, Activity Monitor, DTA, SQL Sentry, EM7, DXIM, Grafana.

Ticketing: CA Service Desk, HP PPM, Cherwell, Assyst, iSolve, Jira, Service Now.
